NEW QUICK GUIDE FROM KINGSPAN INSULATION

Kingspan Insulation, leading manufacturers of premium and high performance insulation products, has updated and released the latest edition of their widely acclaimed Quick Guide to Insulation for New Roofs, Floors and Walls.

This user-friendly publication has been updated to include both domestic and commercial applications providing specifiers, end users, contractors and stockists with information on the entire range of Kingspan Kooltherm rigid phenolic insulation products.

Each illustrated application featured in the handy-sized A5 guide is accompanied by product data, fixing instructions and the correct thickness of insulation required to help achieve compliance with the latest Approved Documents L to the Building Regulations.

Readers will also get an overview of current Approved Documents L and the recommended starting U-values for Levels 3 and 4 of the Code for Sustainable Homes.

The quick guide also provides an overview of the economic, social and environmental sustainability appraisal of Kingspan's largest premium performance insulation manufacturing facility in Pembridge, Herefordshire, carried out by Ove Arup and Partners (Arup) using their Sustainability Project Appraisal (SPeAR[®]) tool.

To obtain a copy of the Kingspan Insulation Quick Guide contact the Kingspan Marketing Department on the following numbers:
